## Part 4: Mapping Visualization

Average Renew Use by State

## Average EV Registrations by State

### Analysis

The state with the most renewable energy also has the most number of EVs. This is California, so a part of these numbers could be attributed to its large population. Florida, Texas, and Washington have the next highest number of EV registrations and they also appear higher on the renewable usage scale. Overall, there is a trend between renewable energy usage and number of EV registrations but some of this trend could be attributed to population size of the state.
